

TASK 2. UNIT 6

Give a brief opinion on the advances, changes in technology in the present world, as we have practiced in class.

In the recent years, technology has become an important part of our lives, changing our way of living.

Social media has dramatically increased our friends network, connecting people from around the world. We can take videoconference calls with people from far away countries at live time.

The most important changes have been implemented by the *Internet*, like the bigger and bigger amount of digital content with applications like Youtube and TikTok for videos, and Instagram for stories. It also possible to read great online content with new platforms like Amazon Kindle or Google Play Books.

The digital data is the new trend and is on the cloud!
